

CloudSync Pro · Business Analysis Case Study Reducing Free-Tier Churn Through Data-Driven Onboarding

Neha Hembrom
Business Analyst Tools:
Python.SQL.Power BI.Figma

THE PROBLEM

FINDING:

Free-tier churn rate is 45% — 9x higher than Enterprise

- 78% of churn happens in the first 14 days
- Customers using <4 features churn 3x more often
- Estimated revenue impact: ₹X lost per month in upgrade potential

THE ANALYSIS

Dashboard for Business Performance Review

This dashboard highlights key cases and includes filters for plans and regions.

The first view shows the data without any filters, and the second view applies filters for the Starter plan and the USA region.

THE RECOMMENDATION

SOLUTION: 4-Touch Automated Email Onboarding Sequence

Day 1 → Welcome + quick-start guide

Day 3 → Prompt: connect first project

Day 7 → Show unused features (personalised)

Day 14 → Free Pro trial offer (triggered by engagement)

Expected outcome: Reduce Free churn from 45% → 25% in 90 days
